

Consider when a ball is being bowled and hits the bat for the score we call it an **EVENT**

Event Breakdown

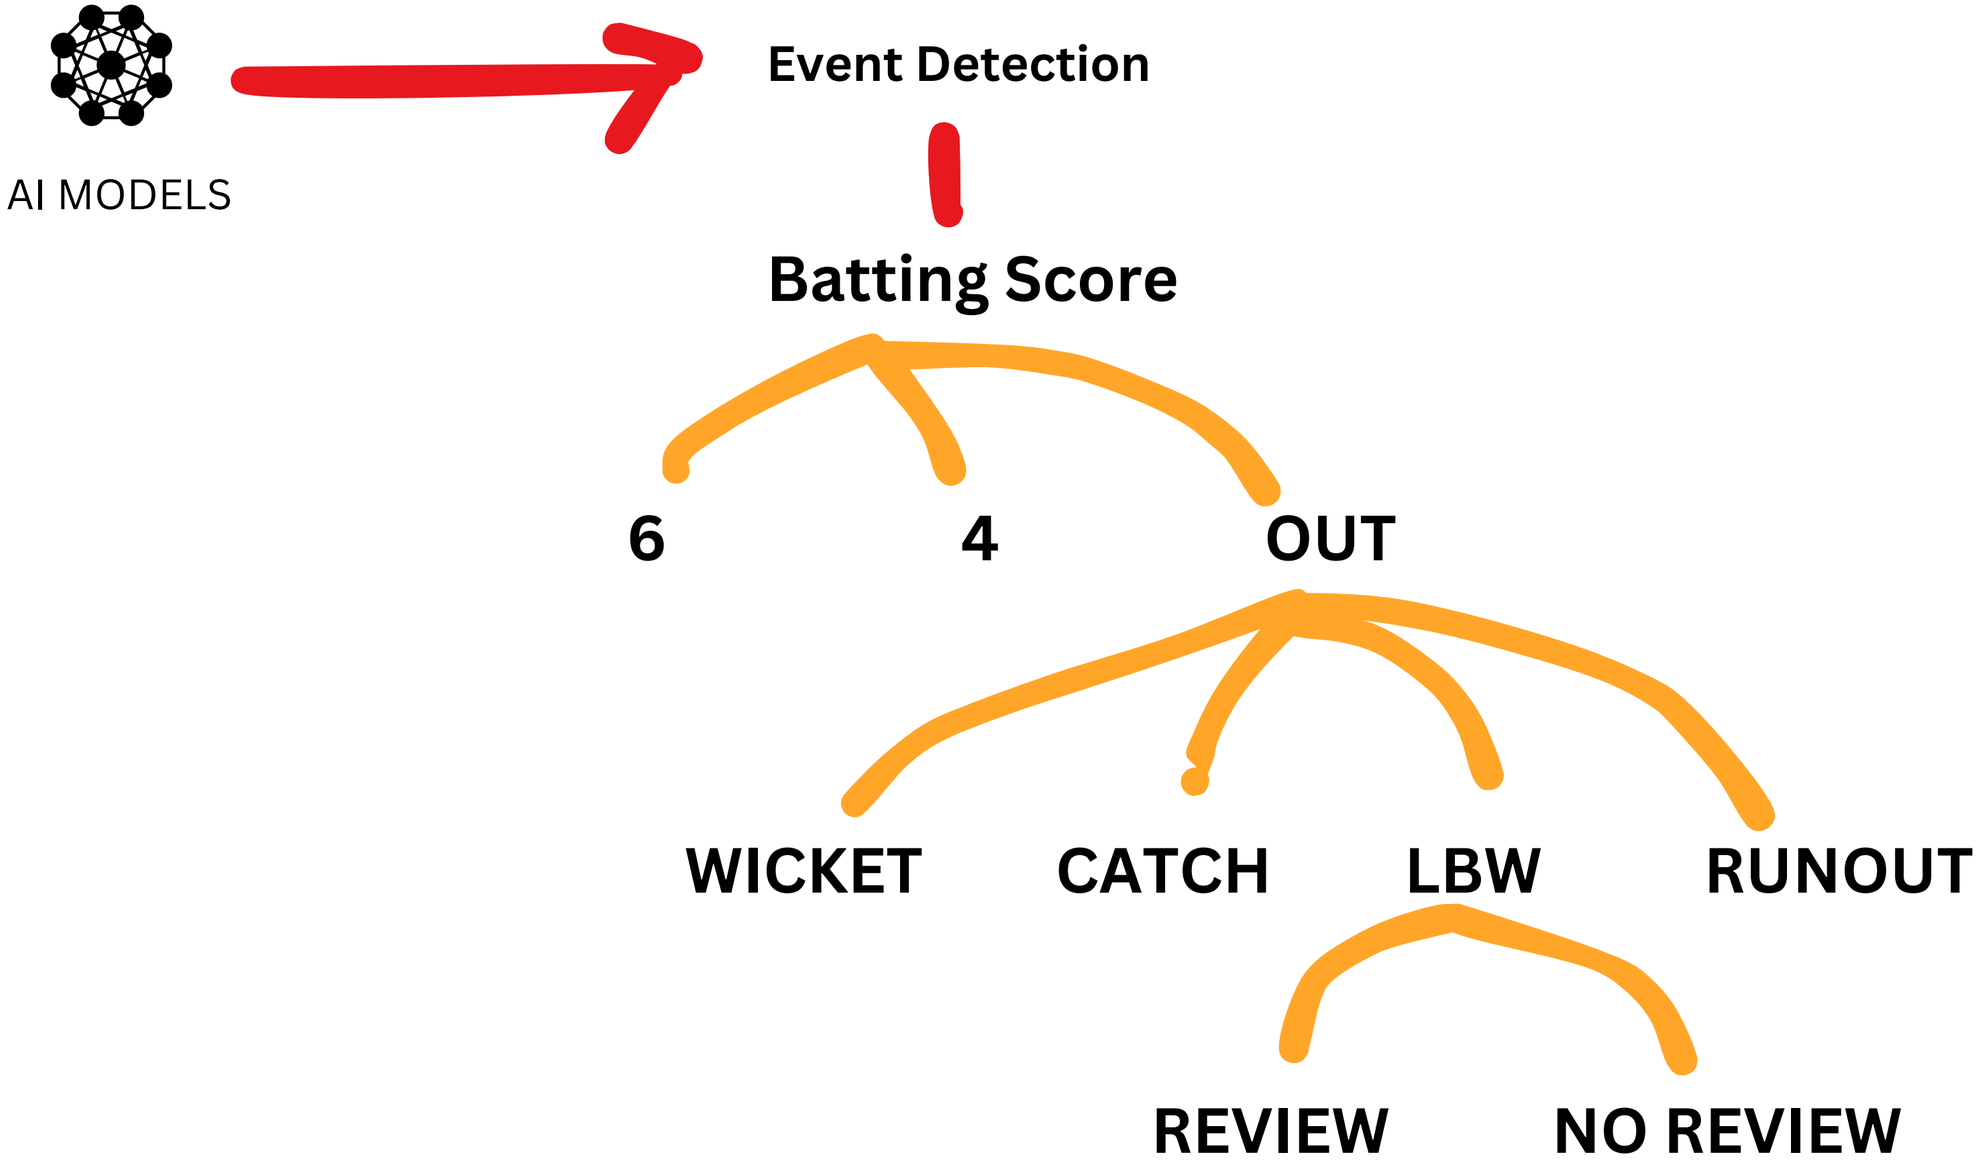

On average the event takes place in 4-5 seconds,

If game is 40fps then

40 x 5 = 200 frames

Video classification

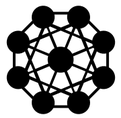

Video Classification part gives us the **Labels**

features

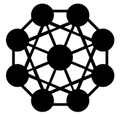

Labels	Static Text
six	It’s a six
four	It’s smashed for a 4

This generates large commentary captions
